

Our Mission

Yolo Bridges is committed to providing quality services, support, and advocacy to children and families experiencing mental health challenges.

WHAT WE DO

BRIDGES is a full services partnership MHSa program designed to provide services to youth under age 16 who have been unserved, under-served or inappropriately served and lacked access to appropriate mental health services. As an MHSa program, services are guided by the concepts of wellness, recovery and resiliency. Bridges services are individualized and designed to meet the unique needs of the youth and family. Intensity and frequency of services are guided by the Child Family Team and are flexible to meet the evolving needs of the family. Services are available multiples time a week, in the evenings and on weekends with access to an on call crisis service.

Therapy, psychiatric assistance, Child Family Team (CFT) meetings

Case management, intensive care Coordination

Rehabilitative services, home-based skills teaching

Family advocacy, emotional support, Resource access

*It is important to note that although 38 (95%) clients at Bridges spoke English primarily, language accommodations were made for 7(18%) clients who had caregivers who spoke a language other than English. This additional language was Spanish

DOMAIN OUTCOMES

A total of 40 unduplicated individuals were served within the reporting period. The domain data from July 1, 2020 to June 30, 2021 is extracted from the Key Event Tracking (KET) form.

Of the 40 individuals served within the reporting period, no clients (0%) accrued days within the psychiatric, hospital, jail, or homeless domains. Meaning that all clients remained in their homes for the entirety FY 20-21

CHILD ADOLESCENT NEEDS AND STRENGTHS (CANS)

The Child and Adolescent Needs and Strengths (CANS) is a multi-purpose tool developed for children's services to support decision making, including level of care and service planning, to facilitate quality improvement initiatives, and to allow for the monitoring of outcomes of services. Versions of the CANS are currently used in 25 states in child welfare, mental health, juvenile justice, and early intervention applications. A comprehensive, multi-system version exists as well. Starting January 1, 2018 the California CANS was introduced as a replacement for the more commonly used Indiana CANS.

The California CANS consists of 50 items broken down into 6 primary domains:

- Child Behavioral/Emotional Needs
- Life Domain Functioning
- Risk Behaviors
- Cultural Factors
- Strengths Domain
- Caregiver Resources and Needs

Items within the California CANS are responded to using a 4-point scale. Response values are as follows:

Scoring	
0	No Evidence
1	History or Suspicion; monitor
2	Interferes with functioning; action needed
3	Disabling, dangerous; immediate or intensive action needed

For the Strengths Domain of the California CANS, items are responded to using a 4-point scale. Response values are as follows:

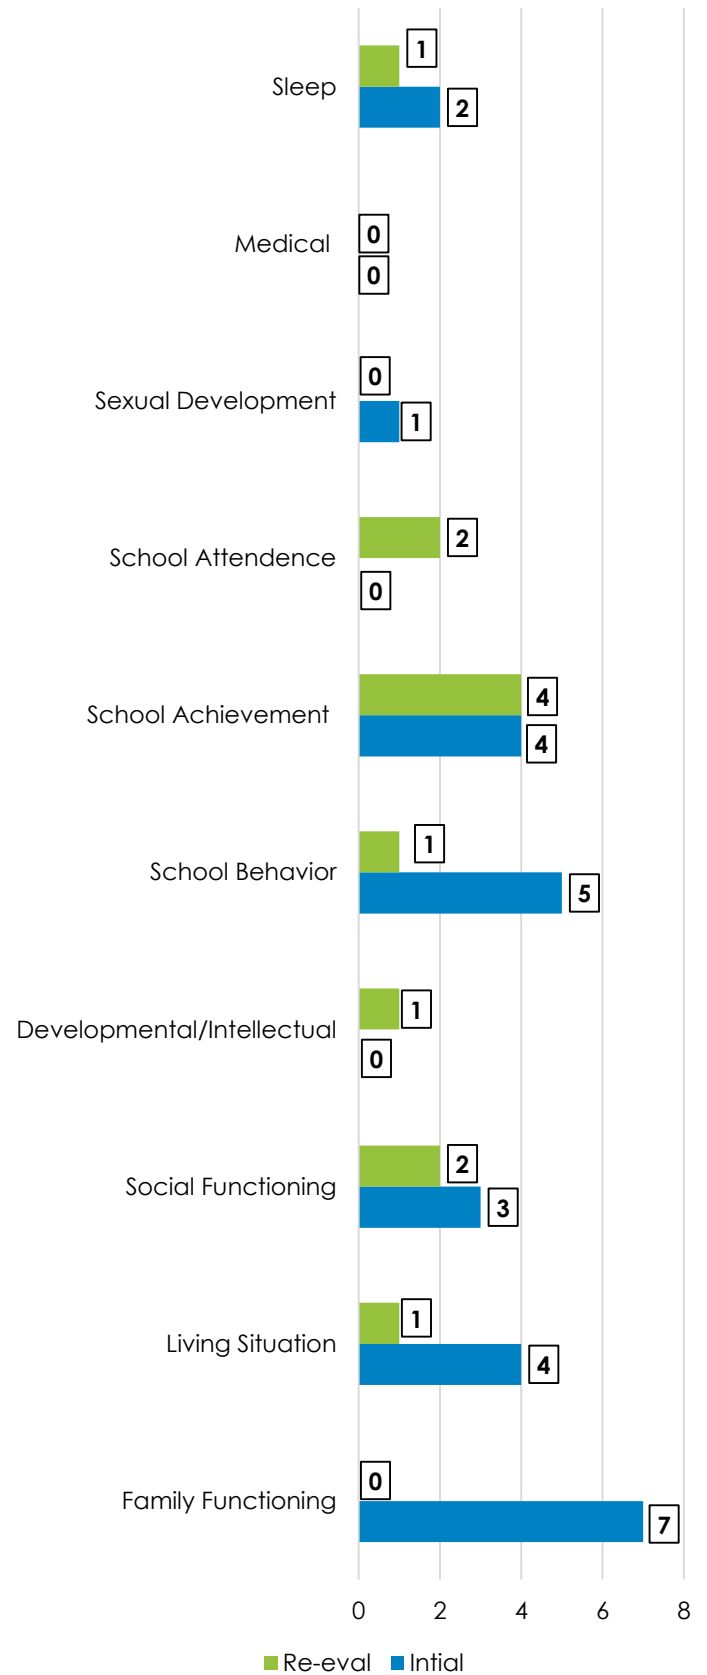

Scoring	
0	Centerpiece Strength
1	Useful Strength
2	Identified Strength
3	No Evidence

Of the 40 clients served between July 1, 2020 and June 30, 2021, 21 (53%) clients were eligible for a reassessment CANS within the reporting period. Of those 21 clients, 16 (76.2%) completed an intake CANS along with a 6-month update CANS or a discharge CANS for their reassessment. Each of the following graphs display the number of scores from each of those clients for all six domains. It is important to note that only actionable scores (2 or 3) were reported on in the graphs below.

Child Behavioral/Emotional Needs

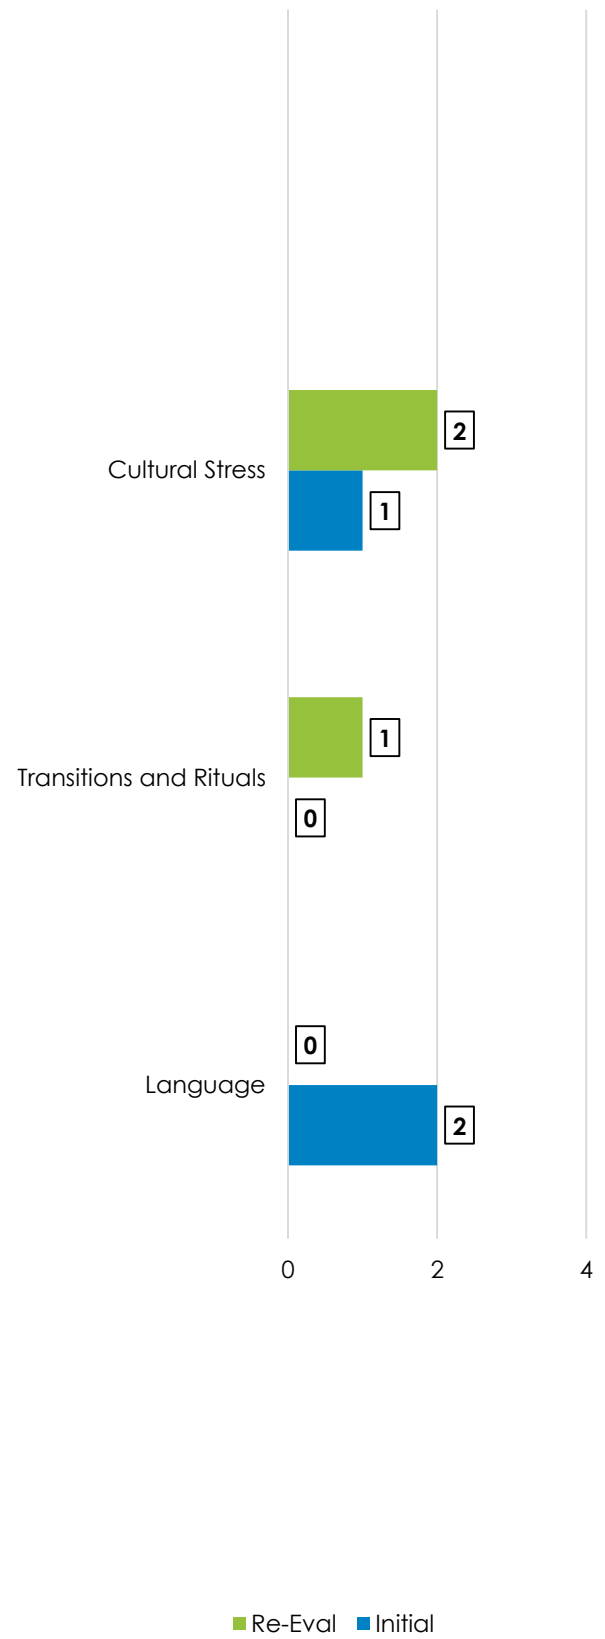

Life Domain Functioning

Risk Behaviors

Cultural Factors

Strengths Domain

Caregiver Resources/Needs
