

Transitional Support Services- Vacaville

ANNUAL REPORT

July 2020 - June 2021

WHAT WE DO

Transitional Support Services (TSS) provides community support services to adults challenged with co-occurring psychiatric disorders and developmental disabilities. The type and intensity of services provided will be based on the minimum level of intervention necessary to maintain the health/safety of the individual and to support progress toward their identified goals. TSS is designed to minimize dependency and to effect the most rapid "normalization" and community integration possible. The central aspect of the TSS program is *member choice*. Before an individual is offered TSS membership, they will be helped to understand the TSS philosophy. TSS will honor each person's expressed goals.

SERVICES PROVIDED

24/7 on-call support, therapeutic services

Linkages, to resources and services

Ongoing psychiatric care, medication management

Intensive psych-social, rehabilitation, supportive housing

CENSUS

A number of individuals served through the TSS Vacaville program switch between receiving Full WRAP, Partial (Half) WRAP, and Quarter WRAP services throughout the fiscal year. The totals above for each level of service include duplicates since, technically, they were served under multiple program types.

*The *Individuals Enrolled* figure does not count duplicates between the different level types but rather counts each person once for accuracy.

**The Total Discharges does not include clients who were discharged internally to higher or lower levels of service within TSS Vacaville but rather counts those clients who were discharged to external destinations.

DIAGNOSES

The 85 unduplicated clients served in the fiscal year had a total of 219 diagnoses on file, including mental health diagnoses, developmental diagnoses, and medical illnesses.

Mental Health Diagnoses (all diagnoses re	eported)
Anxiety Disorders	22
Bipolar and Related Disorders	12
Depressive Disorders	21
Disruptive, Impulse-Control and Conduct Disorders	14
Dissociative Disorders	1
Obsessive-Compulsive and Related Disorders	1
Personality Disorders	4
Schizophrenia Spectrum and Other Psychotic Disorders	16
Sleep-Wake Disorders	3
Somatic Symptom and Related Disorders	1
Substance-Use Disorder	10
Trauma-and-Stressor-Related Disorders	11

Developmental Diagnoses (all diagnoses reported)	
Attention-Deficit Hyperactivity Disorder	16
Autism Spectrum Disorder	21
Borderline Intellectual Functioning	3
Intellectual Disability	42
Other Neurodevelopmental Disorders	4
Medical Illness (all diagnoses reported)	
Acthma	2

Medical Illness (all diagnoses reported)	
Asthma	2
Dementia	2
Epilepsy/Seizure Disorder	2
Fetal Alcohol Syndrome	2
Genetic Disorder	1
Neurocognitive Disorders	1
Other Medical Condition	7

DOMAIN OUTCOMES

A total of 60 individuals were served in the 19/20 fiscal year. 85 individuals were served in the 20/21 fiscal year. The first graphic below is a comparison of all clients served in 19/20 versus all those served in 20/21. The second graphic compares only those individuals served in the 19/20 fiscal year who continued to be served in the 20/21 fiscal year (N=27).

8 Determinants of Care

TSS-Vacaville utilizes the 8-Determinants of Care, which is a clinical and administrative tool that allows us to measure where individuals are in their journey of recovery and produce data that describes the journey of recovery over time. This tool includes the Milestones of Recovery Scale (MORS), in addition to incorporating other specific domains to support a more effective service continuum. The MORS has 8 possible categories of recovery, or milestones, in which a client may be assessed to be at. They include:

- Extreme Risk (1)
- High Risk/ Not Engaged (2)
- High Risk/ Engaged (3)
- Poorly Coping/ Not Engaged (4)

- Poorly Coping/ Engaged (5)
- Coping/Rehabilitation (6)
- Early Recovery (7)
- Advanced Recovery (8)

With regards to the 8 Determinants, clients are assessed on whether or not they need support in each of the 8-Determinants of Care.

- 1. Managing Financial Resources?
- 2. Coordinating Transportation?
- 3. Daily Living Skills?
- 4. Weekly contact with staff to coordinate care?
- 5. Managing Medication?
- 6. Managing Community Relationships and Minimizing Disruptive Behaviors?
- 7. Been at current level of MORS less than six months?
- 8. Require CSS Flex Funds?

The TSS program does not have internal CSS funds, so the 8th determinant of care is not applicable and excluded from the analysis.

Upon scoring each item, a composite score is calculated based on multiple factors. The composite score represents the program level the client should be enrolled in. TSSs are considered a level 4 program. A lower score indicates that a lower level of care may be needed, while a higher score indicates the need for a higher level of care.

8 Determinants of Care Composite Scores

Client Group	#	%
Clients with a score of 4 (TSS is a level 4 program)	37	43.5%
Clients with a score below 4 (lower level of care possibly needed)	37	43.5%
Clients with a score above 4 (higher level of care possibly needed)	0	0.0%
Clients with no score	11	12.9%
Total	85	100%

8 Determinants of Care/Milestones of Recovery Scale (MORS) Continued

The following is based on 74 individuals with the 8 Determinants of Care entered for June 2021.

Client Group	#	%
Clients requiring support to manage financial resources	60	81.1%
Clients requiring support to coordinate transportation needs	40	54.1%
Clients requiring assistance with 2+ ADLs	39	52.7%
Clients requiring 1+ weekly contact to coordinate care	62	83.8%
Clients requiring support to manage medication(s)	33	44.6%
Clients requiring support to manage community relations & minimize disruptions	31	41.9%
Clients with less than 6 months stability in current MORS level	37	50.0%

The following is based on 45 individuals with the 8 Determinants of Care entered for July 2020 and June 2021.
